PROGRESS REPORT

- a. Urban and Regional Planning Proposal No. Y-10-066-001
- b. SR 196
- c. No data have been received for the test area.

Study of ERTS-1 images of other areas, together with reports made by other investigators at the September 29 Users Meeting, leads to the opinion that the quality of data obtained shows no apparent inconsistency with the objectives of this study.

Arrangements for the computer analysis part of the study have been made more firm than described on the proposal. GE-635 computers at Kennedy Space Center will be used. Development of analysis methods will be the responsibility of Dr. G. L. Thomas. Programming will be done by Fernando Esparza, of Kennedy Space Center.
